PROFESSIONAL SUMMARY

Full-stack developer with a strong focus on building scalable web applications using Django and Python. Experienced in designing backend systems, RESTful APIs, and business-focused platforms — including SaaS products, dashboards, and automation systems.

Skilled at delivering real-world solutions such as WhatsApp commerce platforms, Wi-Fi access control portals, fintech investment simulators, and vendor management systems. Passionate about building efficient, user-focused applications that solve practical business problems.

TECHNICAL SKILLS

- Python
- Django / Django REST Framework
- PostgreSQL
- REST API Development
- HTML, CSS, JavaScript
- Railway · Git · Twilio · Paystack

EXPERIENCE

Freelance Full-Stack Developer

2024 – Present

Self-employed · Lagos, Nigeria

- Built web applications for personal and client projects using Django and Python
- Designed and deployed backend systems, RESTful APIs, and data dashboards
- Delivered a WhatsApp multi-vendor commerce platform (ProductBot) with Twilio and Paystack integration
- Built ZovoAssets, a live fintech investment simulation platform deployed on Railway with a custom domain
- Developed business-focused digital systems including SaaS concepts and vendor automation tools

PROJECTS

ProductBot

[Live →](#)

WhatsApp Multi-Vendor Commerce Platform · Django · Twilio · Paystack · Railway

- Multi-vendor WhatsApp bot with vendor code routing, order tracking, and inventory management
- Full vendor dashboard with signup, login, email verification, and subscription management
- Paystack subscription integration, atomic stock deduction, and low-stock alert notifications
- Deployed on Railway; actively extending with agentic AI/LLM integration via Claude API

ZovoAssets

[zovoassets.com →](https://zovoassets.com)

Fintech Investment Simulation Platform · Django · PostgreSQL · Railway · Namecheap

- Full Django platform with apps covering investments, loans, trading, deposits, and accounts
- Simulated live trading with Canvas-based charts and a dark gold design system
- 3-step registration onboarding, 4-digit hashed withdrawal PIN, and a live animated price ticker

- Custom domain via Namecheap, deployed to Railway with PostgreSQL and production-ready config

PepperHouse Wi-Fi & Co-Working System

Smart Internet Access & Coworking Management · Django · MikroTik · HTML/CSS

- Captive portal login system for Wi-Fi access control in cafés and shared workspaces
- Timed internet access sessions (2–3 hours) with voucher-based access and user tracking
- Planned integration with MikroTik hotspot system for full user and session management

EDUCATION

Higher National Diploma — Computer Science

2014 – 2016

Federal Polytechnic Auchi

ADDITIONAL INFORMATION

- Strong interest in SaaS, fintech, and scalable web systems for African markets
- Currently building and extending real-world business automation products
- Open to junior developer, backend developer, or full-stack developer roles
- Interested in startups and product companies in fintech and B2B SaaS
